

- Like all the fonts the same- makes it all cohesive
- Like the backgrounds- fits aesthetics
- Same font- makes cohesive
- Homepage- change pic or no pic (looks like she's floating)
- Nav bar - separate pages good
- Phone version --> title then album pic and then text
- Home screen maybe not exact same as lover album, just similar vibe
- Scrollbar might be difficult-- can make a grid if too difficult, click and move to page
